PRINCE PANDEY

princep22196@gmail.com | +91 8928759967 | Prince-github | Prince-Link

Summary

Motivated AI/ML Engineer skilled in Python, automation, AI agents, machine learning, and generative AI. Experienced in building end-to-end AI solutions involving data handling, predictive modeling, NLP, LLM integration, and model deployment. Published researcher in Deepfake Detection (ICATT-2025). Oracle OCI Generative AI Professional certified (2024 & 2025).

Education

B.E. in Artificial Intelligence and Machine Learning
St. John College of Engineering and Management | CGPA: 8.2
Higher Secondary Certificate (HSC)
Viva College of Science, Mumbai
Secondary School Certificate (SSC)
Himalaya High School, Mumbai

Skills

Languages: Python, JavaScript, Bash, HTML, CSS, JSON
Libraries/Tools: Pandas, NumPy, Scikit-learn, TensorFlow, Matplotlib, Seaborn, Jupyter, Excel, Unity, N8n, Django
Concepts: Supervised Learning, Classification, Regression, Model Evaluation, Feature Engineering, Deep Learning, NLP, LLM Integration, Model Deployment, Prompt Engineering
Systems: Linux, Windows, Git
Domains: Artificial Intelligence, Machine Learning, Generative AI, AI Agents, Automation, AR, VR, MR

Certifications

- **OCI Generative AI Professional (2024 & 2025)**
  Oracle Cloud Infrastructure
- **Python Programming**
  GUVI
- **Advanced Prompt Engineering**
  Simplilearn
- **Generative AI Crash Course**
  Google

Projects

Quiz Game | *Python, JavaScript, UI Design*
- Developed an interactive quiz game with randomized questions and difficulty levels
- Implemented real-time scoring, timer, and leaderboard for user engagement
- Designed a clean, user-friendly interface with instant feedback on answers

Gym Buddy with AI Chatbot | *Python, NLP, AI Chatbot, Automation*
- Built a fitness companion app with personalized workout and nutrition recommendations
- Integrated an AI-powered chatbot using NLP to provide real-time fitness guidance
- Added progress tracking features for workouts, calories, and performance monitoring

Multi-Model Disease Prediction Platform | *Python, Scikit-learn, Machine Learning, NLP, Django*
- Designed a healthcare platform capable of analyzing multiple diseases in one system
- Integrated machine learning models for disease detection and stage prediction
- Added chatbot support for nearby doctor recommendations and teleconsultation
- Provided personalized medicine and supplement suggestions based on analysis

Pushpa Royale (Unity Game) | *Unity, C#, AR/VR/MR, 3D Development*
- Developed a real-time 3D action game in Unity with immersive environments and character models
- Implemented combat mechanics, animations, physics, and particle effects for realistic gameplay
- Optimized performance for smooth cross-device experience with responsive controls

Experience

- **AI | ML Intern in Valuescore Business Solution LLP**
- **Account Manager in Trackon Courier Pvt Ltd**
- **Campus Ambassador of MSME**
- **Web Development Intern | Elite Forum**
- **Treasurer of Acropolis**

Achievements

Publication: Research paper on **Deepfake Detection** published at **ICATT-2025** (International Conference on Advanced Technology Trends)
